DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 47, 48, 50 and 51 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka (5,954,506).

Claim 47 - element -142- is a magnetic implant with a fixing member (for securing) passing through the magnet. The fixing member may be a screw which is inherently movable to enter an aperture in the magnetic implant. The screw is of fixed length.

Claim 48 - the screw is configured to penetrate tissue.

Claim 49 - figure 26A set forth an embodiment where the fixation member is magnetic.

Claim 50 - a screw is inherently threaded and the threads would resist withdrawal.

Claim 51 - the screw is configured to pass through the magnet.

Allowable Subject Matter

Claim 52 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
